Rethinking How We Work

So we have all heard the reports of the health benefits of walking, but who has the time? Now, by rethinking *how* you work, you can walk your way to better health *while* you work. LifeSpan's universal console with multiple treadmill options works with any stand-up desk to provide a versatile platform that can be customized to your specific needs. The whisper-soft treadmills come standard with two of LifeSpan's trademark features, Intelli-Guard™ and Intelli-Step™.

The small console sits on your desktop giving you easy access to the control buttons and readouts without getting in the way of your work. The LED display shows steps taken, walking time, calories burned, distance travelled, and walking belt speed.

In addition, this new console is Bluetooth-enabled so you can connect wirelessly to your computer to automatically track results while you exercise. Once your workout is complete, sync your data with your LifeSpan Fitness Club account to retain your exercise history online.

Now getting the exercise you need is no longer about finding the time, it's about rethinking how you work. Take the first step toward better health with LifeSpan's treadmill and desk display.
